1. Claims 1-25 are pending and allowed.
2. The following is an examiner's statement of reasons for allowance:

The closest prior art of Ginzboorg et al. (US 6,240,091 B1) teaches the access service is offered by connecting the user terminal to the network providing the services through interface elements which connect the access network and the network providing the services. As a response to the access service at least one charging record is generated. The record is transferred to billing means for billing the access service subscriber for the access service. The terminal is given access to the network providing the services, if said messages are received in an acceptable manner. The terminal sends the network data about the subscriber associated with the current user of the terminal, whereby said data are used to verify the validity of the signatures and to target the charging messages received from the terminal at the billing of the subscriber in question.

In regarding to independent claims 1-2 and 24-25, Ginzboorg taken either individually or in combination with other prior art of record fails to teach or render obvious the charging server calculates a network access charge by said charging server according to a charging method information selected by said customer, said charging method information including at least one information item selected from the group consisting of: a size of the advertisement displayed on the information terminal, a number of advertisements displayed on the information terminal, electronic commerce

deal amount, electronic commerce deal frequency, and communication traffic state information concerning a communication traffic state in the public network.

In regarding to independent claim 23, Ginzboorg taken either individually or in combination with other prior art of record fails to teach or render obvious one or more of an Internet access service providing method, an advertisement distribution method, and the charging method associated with Internet access are changed according to the state of Internet usage by the customer and the result of the selection by the customer of the desired charging method information in the charging table, and the information terminal is configured to automatically change a provider.

3. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
